

THE CANADIAN BANK
OF COMMERCECrop Report for Alberta at August
15th, 1921.

Wheat	Oats	Barley	Flax	Rye	%	%	%	%	%
North-West	112	105	191	98	194				
North-East	109	194	105	98	103				
West-Central	64	74	71	71	74				
West-Central	34	43	47	52	70				
East-Central	87	87	95	127					
South-West	68	74	66	82	86				
South-East	72	73	80	197	100				
Average	77	81	80	86	95				

General Conditions

Northern District: Heavy showers were general throughout the district and as a consequence ripening of the grain has been retarded. The later grain are filling well, but with warmer weather these should mature rapidly, although with the delay in ripening there is a possibility of danger from frost. While cutting has been delayed by recent rains harvesting should be fairly general within a week.

West-Central District: Cool weather with heavy showers has favored the filling of the grain. While crops on summer-fallow land are fairly good, in many cases the grain sown on spring and fall ploughing is too short in the straw to be satisfactorily cut by binders. Considerable damage was done by hail in some districts—especially in the vicinity of Crossfield and Irricana. At some points damage by grasshoppers has materially reduced the anticipated yield of rye and oats.

East-Central District: The weather has been cool interspersed with slight showers. All later crops are progressing favourably and harvesting of wheat is general throughout the district.

Southern District: Harvesting is now general, and at some points has been completed. The weather continues warm relieved by light rains at some points. The damage from the grasshopper pest has in many cases proved to be greater than at first anticipated, and in some instances oats are being cut green to prevent damage from this source.

J. B. Corbet,
Superintendent Alberta Branches.SIXTH SEMI-MONTHLY
CROP REPORTDEPARTMENT OF AGRICULTURE
Edmonton, August 17th, 1921.

Harvesting in all parts of the province will be earlier this year than for a number of years past. Cutting of wheat and barley is well under way throughout the south and a start has been made in the central and north. The cool, damp weather of the first week in August was particularly favourable for the filling of all crops. This has been followed in the past few days by bright warm weather so that the crops are now ripening fast. Up to the present time no frost has been reported. The districts of Peace River, Grande Prairie and Athabasca will reap the heaviest crop in their history. Moisture came in these districts early in the season and light rains have continued throughout the growing period. Conditions have also been very favourable along the Canadian National and Grand Trunk lines east and west of Edmonton. Where the land has been well prepared in this area a heavy crop will be harvested. In Peace River and Grande Prairie along the boundary of C. and N.W. of Edmonton in the Pembina district some yields of wheat will run over fifty bushels to the acre. The south and south-east of Edmonton the crops commenced to run lighter. The average yield in the big central area of the province will be less than for several years past.

Hot dry weather in the latter part of June checked the growth to a considerable extent. Plenty of rain fell during July and the early part of August but was somewhat late to be of most benefit to the growing crop. The southern area, including most of the territory south of the line of the C.P.R. and the territory in the central-eastern part of the province have in general very short, light crops. There are sections of considerable extent within these areas where good crops of wheat will be harvested even up to an average of thirty bushels to the acre. This will be the case in part of the district south of Lethbridge and also along a portion of the Foremost branch of the C.P.R. and in a small district east of Medicine Hat along the boundary. There are also other sections in the area mentioned where some good crops will be harvested.

The crops in the irrigation belt east of Calgary and east and south of Lethbridge are looking very well. Grasshoppers have spread very widely throughout the district during the past two or three weeks. This is due to the fact that farmers generally stopped poisoning when it was evident that their crops were going to be small on account of dry weather. It will be necessary for farmers of the south who purpose sowing rye this fall to poison extensively if they hope to save the young crop.

Two very severe hail storms have visited the province during the past two weeks. One of these storms travelled from west to east just south of Edmonton, and the other in the same direction some "longer distance" north of Calgary. Both of these storms were very destructive, but apart from these hail storms have not been particularly prevalent.

It is a difficult matter to make an estimate of the average yield of grain for the province during the present year owing to the fact that considerable areas in the south have a complete failure, the central part a medium crop, and the north and north-east a heavy crop. A careful study of the whole situation, however, has been made, and the first estimate of the provincial department places the average yield of wheat at eleven bushels per acre, oats twenty-eight bushels per acre, and rye fourteen. These estimates are made on a basis of the

total acreage sown. The hay crop, generally speaking, will be light except in the northern portion. The department would recommend that all the feed possible be put up. Conditions at the present time would indicate that southern farmers will require to ship in a considerable amount of feed for their live stock.

H. A. Craig, Deputy Minister.

FRANK STATEMENT
OF LLOYD GEORGE
GIVEN APPROVALLondon Times Says a New Voice Has
Been Heard in World Affairs.

London, August 19.—Endorsing the statement of Premier Lloyd George in the house of commons with reference to the Anglo-Japanese alliance, the London Times in its editorial states: "Plainly it represented the consideration of judgment and deep aspirations of the Dominion minister and the representatives of India, as well as the prime minister and government of Great Britain."

Regarding the statement that precedent would be easier if preceded by a Pacific understanding, the Times says: "Both for the United States and Japan the voice of the British empire uttered thus for the first time in a matter of incomparable importance may add much to the understanding of the world. It is a new voice in world affairs; or it is not new, it at least now is newly articulated."

Through the premier, continues the paper, the British people "declare their intention of standing by Japan and propose to the people of the United States common action to make war on the aggressor of the world."

The Times asserts that this statement "indicated the debt of honor to the British people to Japan, no less than their sentimental attachment to a long held loyal ally."

And was "rightly frank in the recognition of the special plea, that the Anglo-Japanese alliance could be shorn of its already on the land to put it to the best possible use."

There is another survey, which should be taken in hand with the least possible delay. It is the gathering of specific and accurate information regarding the fishery resources, not alone of Western Canada, but the Ontario territory adjoining Manitoba.

Leslieville is soon to have a butcher shop, also a grain elevator. Leslieville has land around it that will grow almost anything. If you doubt it just investigate and you will see what is being done. Fruit grows in the Leslieville district can be shipped the same day as it is picked, and landed in Edmonton at 4 p.m. Just ten hours away from a good city market. The land here is open which to grow the stuff and it's needed. Look it up for yourself.

STOCKING STREAMS AND LAKES (Winnipeg Tribune)

Government experts in the three Western provinces are engaged, or proceeding to engage, in the work of a comprehensive agricultural survey of the resources of the vast territory, also the suitability of certain sections for special lines of agricultural production.

This is splendid work, tending to save prospective settlers from much disappointment and suffering, those already on the land to put it to the best possible use.

LESLIEVILLE

August 15, 1921.

The Chautauqua drew a large crowd on the concluding evening of their tour. The Victorian Ladies' Quartette came in for well merited applause. When the time came to ask for the signatures of those wishing to have the Chautauqua come next year, Mr. C. Thompson was fairly besieged with applications. Dr. Jones' great inspirational lecture, "The Red Horizon," was listened to with much interest, and will not soon be forgotten. But for an institution like the Chautauqua, it would be an utter impossibility to have in Leslieville a lecture of the calibre of Dr. Jones. We wish the institution every success and commend its enterprising to all who like to hear good music and educational lecturing.

Good haying weather. Grain all headed out and in places rising fast. Roads all dry and hard and fairly smooth.

Mr. James Allen, of Coleman, and Mrs. Allen and little daughter are visiting at the home of Mr. Robert Monks at present.

There are prospects of Leslieville school opening under new tutelage shortly.

Leslieville is soon to have a butcher shop, also a grain elevator. Leslieville has land around it that will grow almost anything. If you doubt it just investigate and you will see what is being done. The other day two Winnipeg fishermen reported a catch in the Niagara district of a few "rainbow trout." The spawners of this species was planted a short time ago in a few of the small streams tributary to Lake Superior. The results have been satisfactory. Likewise, some years ago, black bass spawners were placed in the Lake of the Woods, and this fine species of sport and table fish is now available in sections of the lake.

Hundreds of lakens, lakelets and streamlets between Winnipeg and the eastern boundary of Manitoba, north and south. The quality of the water, the shore and bottom, and the fact that it does not differ materially from the natural habitat of stream trout in Ontario and in Alberta and British Columbia. With a little concentration of effort, it should be possible to stock the Manitoba waters with the finest game fish in the world.

On the wider side of the fishery question every body of water in the West should be charted, with information easily and comprehensively available as to our real fishery wealth. The task is not a very expensive one. We should know our natural wealth, and on the pleasure side there is opportunity to add, within a few years, greatly to the summer enjoyment of our citizens.

Lumber is Down

Yes, lumber is down—down to where a farmer can afford to build anything that can be made of lumber, even in the face of a low market on farm products.

Lumber was the last farm commodity to go up and the first to come down.

TODAY LUMBER PRICES

are down to where it is hard to see how they can go any lower.

BARN OR HOUSE

or just some boards for fixing up around the place, the facts about lumber will appeal to any man or woman who believes in thrift and knows values.

COME IN TODAY

and talk over your practical problems. We want to be helpful, and we welcome an opportunity to show you.

OUR GARDENS

At least one effect of the recent Horticultural Show has been to draw the attention of the citizens to the beautiful gardens that we have in our midst. There is no place in the west more adapted to the growth of magnificent flowers and delicious vegetables, and a tour of the city at this time is an experience to those who have not been paying special heed to the results that have attended the efforts of our local gardeners.

The display at the Show last week was delightful, and the Society deserves all the congratulations that it is receiving on what was accomplished in bringing these products together. It is the general excellence of our gardens, however, which expresses the character of the work that has been attended to by the Red Deer gardeners. If you have not paid special attention to the city with that special object in view, it is the work of Commissioner Stephenson, T. S. Miller and many others during all these years that has inspired this general improvement in our gardens. Leave the car in the garage for an evening and draw near to the flowers. After you have seen the beautiful private gardens, take a look at the exquisite display at the Soldiers' Hospital, which has been rated by Mr. Stowe as the finest in Western Canada.

Red Deer has every reason to be proud of her gardens, and especially her beautiful flowers. All honor to our faithful gardeners and a benediction Providence.

A FRIEND IN NEED

It is a cause for deep regret that the Red Deer Agricultural Society finds itself in a rather serious financial situation as the result of this year's operations. This has been a disastrous year for Fair Boards all over the country. Almost every Fair has had a large increase in exhibits as well as a decrease in public patronage. Both these results are the effect of the strained economic conditions that prevail at the present time. People are loath to make expenditures that are not absolutely necessary, and the Fair has been compelled to go by the Board. Likewise, the Agricultural Society has been attracted by the liberal price offerings, and has gone to more than ordinary trouble to secure what he could.

With an unexpected decrease of some \$1800.00 in gate receipts, and an increase of some \$3,000.00 in agricultural prizes paid out, coupled with other heavy decreases in the revenues from concessions, it is not remarkable that the Society finds itself facing the necessity of getting \$3,000.00, somehow, to meet its liabilities.

The Agricultural Society is a friend—a public benefactor for this district—which must receive the necessary support to keep its head above water. Our annual Fair brings business and publicity to the district which cannot be valued in dollars and cents. The citizens cannot afford to run the hazard to their own property investments of allowing the Fair to come into disrepute. Its interests are bound up with the public welfare. Our friend is in need, and is about to make an appeal to the public for support. Ten dollars apiece will not be a heavy drain on anyone, but a fairly general response will save the life of this valued institution.

APPRECIATED

The Canadian Ayrshire Review for August has the following reference to the visit of W. P. Stevens to the Red Deer Fair last month:

"Secretary Stevens returned from his five weeks trip through the west on July 30th, much invigorated after enjoying the Western air and Western hospitality. He judged all the dairy cattle at Calgary Exhibition, Ayrshires at Saskatoon, and conducted the Dairy Cow Judging Demonstration before the returned soldiers, who have settled on the land at Red Deer. Here he had a very interesting class of young men, the kind that make good colonizers, and all hungry for information about the dairy cow."

This reference gives some idea of the estimate that has been formed of the new line of effort that was put forth by the Fair in this recent enterprise, which opens up new lines of service, with wonderful possibilities.

would not interfere with, or try to influence, the new administration. To guarantee that he would refrain from doing so indirectly through the organization of which he is the head would mean that the U. P. A. had thrown overboard one of its leading principles. In the eyes of the U. P. A. their elected representatives are not representative of the people as a whole but delegates of the U. P. A. who must at all times consider themselves responsible to that organization, accepting its views of public matters that come up for decision and submitting to the recall if they do not represent faithfully the United Farmers of Alberta.

Mr. Wood's assurance is, therefore, a little difficult to understand. He proceeded also to express the utmost confidence in the new Alberta government. It is sincerely to be hoped that the new administration will serve the province well, but if Mr. Wood's satisfaction is due to the belief that the new government will faithfully and completely represent the organization and not need any interference or "directing," then that is another matter. The new administration, however, has the field, it will be given credit for all the good work it does, and a few months will better show the operation of the U. P. A. principle of constant responsibility of elected representatives to the organization.

REDISTRIBUTION

Unofficial figures issued at Ottawa state that the census now being completed will show a population of 3,200,000 in Canada. This will give Western Canada 72 members of the Dominion Parliament when redistribution takes place, made up as follows: Manitoba, 18; Saskatchewan, 23; Alberta, 18; British Columbia, 19; Yukon Territory, 1; Eastern Canada, 12. The new members of the Dominion Parliament will be as follows: Quebec, 65; Ontario, 80; Prince Edward Island, 3; Nova Scotia, 14; New Brunswick, 10. It will be seen that the West has a long way to go before it will equal the East in the number of members of the Dominion Parliament, but that day will surely come. In the meantime the West is making the people strike an active and up building interest in public affairs—Canadian Finance.

ORGANIZED LABOR IN ENGLAND HAS SPENT ITS ROLL

Winnipeg, August 19.—"Organized labor in England and Scotland is so financially crippled as a result of protracted strikes, disputes and lock-out that it is unable to offer much strong opposition to wage reductions which manufacturers are endeavoring to put into effect generally," was the statement here today of Neil McLean, of Glasgow, Labor member in the British parliament. He is in Winnipeg to attend the Trades and Labor Congress convention next week, and later he will make a trip through the west. Mr. McLean said that the huge reserve funds created by labor organizations during the war, which were unemployed, was almost unknown, had been exhausted during the first six months of the year in fighting wage reductions and in looking after unemployed. "Feeling among millions of workers in Scotland and England is very bitter," he said, "over the outcome, and if the necessary finances were available every worker in England would strike."

A little boy, the youngest member of a large family, was taken to see his married sister's new baby.

He seemed more interested in the contents of the baby's basket than in the baby, and, after examining her, he picked up a powder puff.

Much surprised at his discovery,

and looking quite shocked, he said, "Isn't she rather young for that sort of thing?"

Physicians attending Prince Alexander of Yugoslavia, who is ill in a private hospital at Neuilly, have hesitated to perform an operation for appendicitis. They do not believe he is strong enough to stand another major operation.

Exceptional Bargains in DINING ROOM FURNITURE

1 ONLY—8-PIECE, QUEEN ANN PERIOD DINING ROOM SUITE—Solid Oak in Old English finish. Consisting of 1 large 54 inch Buffet, with sloped mirror back; 1 large 48 inch Round extension Table, which extends 8 feet when opened, base has 6 nicely shaped legs; 1 set of 6 Dining Chairs, which have slip seats, upholstered in genuine leather. This is an exceptionally pretty suite, and is considered good value at our regular price of \$250.00. It is yours for only \$198.75 if sold immediately.

HERE IS ANOTHER GOOD ONE

1 ONLY—9-PIECE DINING ROOM SUITE, in black walnut finish, consisting of 1 Buffet, 1 China Cabinet, 1 Pedestal Extension Table, and a full set of diners, upholstered in genuine leather. This is also a very pretty suite, and of good design. Our regular price is \$250.00. Will accept \$195.00 for immediate sale.

THE BEST BARGAIN OF ALL

1 ONLY—EXCEPTIONALLY LARGE, MASSIVE PEDESTAL EXTENSION TABLE, solid fumed Oak (William and Mary Period Design), and full set of Dining Chairs to match. FARMERS IN QUEBEC NOW ORGANIZING

Quebec, August 21.—The United Farmers of the province of Quebec, who claim to have organizations in eighteen counties, made their first appearance in the district of Quebec, when they addressed a meeting of farmers assembled at Charlevoix this afternoon. About 1,600 farmers attended the meeting. All the speakers stressed the point that the movement was a democratic one and had for its object the organization of farmers socially and economically, and even commercially, if such need were felt. The advantages of uniting were explained to the farmers of Quebec district, and they were told that the delegates whom they would send to attend the annual congress of the United Farmers would speak and vote for them according to their wishes. The farmers were also informed that when the organization was carried out they would have the advantage of direct buying, which would enable them to secure most of their needs at wholesale prices.

CONDOR NEWS

Don Frost, son of E. R. Frost, who recently bought the Jackson farm, had the misfortune to break both bones of his left leg the day they moved on to the farm. He was riding his pony when it slipped and fell, crushing Don's leg.

The grain that was hauled on July 5th has made wonderful progress, and promises to be a fair crop if only frost will hold off for another two or three weeks. Major Meeres and E. R. Frost have bought the crop on the Crummy farm from the S.S.B. and are busy putting up the feed. The Bartons are busy harvesting that looks like a bumper crop. Elmer Crummy and Stewart Meeres leave Condor for the Camrose Normal school on Saturday, July 20th, and the neighbors are wondering how the Major will get along without his majesty, Stewart. Mrs. Crummy accompanies Elmer to Camrose.

The school teachers of the surrounding districts had a camping party at Wood Lake over the last week end, and report a most enjoyable time.

WILL NOT INTERFERE

From Press, Winnipeg: President H. W. Wood, of the United Farmers of Alberta, in an interview in Winnipeg, said that he would not interfere to the new government of Alberta but would continue to be actively in the affairs of the organization. Presumably, he meant that, directly and personally, he

An Aggressive Farmers' Government

Premier Greenfield, a practical and successful farmer, has chosen his cabinet. He will lead the Farmers' Party in the next legislature. He places great faith in the ability of the men he has selected to form his cabinet, and in his public utterances has given the impression of a dominant, capable personality. He promises an aggressive, progressive government for all classes of the community.

PREMIER GREENFIELD

Every farmer in northern and central Alberta will wish to keep in intimate touch with this movement. The best way to do this is to subscribe for the

Edmonton Journal

The Favorite Daily Newspaper of Northern and Central Alberta.

The Journal has been foremost in publishing full details of the new Farmers' Party and the new Farmers' Government. It was the first newspaper in Alberta to give an authoritative announcement from Premier Greenfield. It has published impartially full particulars of the election that resulted in the return of the Farmers' Government. It is carrying at the present time, one each day, a series of biographical sketches of the U.F.A. members, each accompanied by a portrait engraving. And for a long time, even before there was any likelihood of a Farmers' Government, it has regularly published full details of U.F.A. activities throughout the province. This policy will be continued. You cannot do without the Edmonton Journal if you wish to know all about the Farmers' movement.

Daily by mail, Eight Dollars per year

Wed. and Sat. issues only, \$2.00 per year.

Plats of cooked potatoes—Mrs. Row, Taylor, Hogg, Mrs. George, commended.
Collection of vegetables—Stephenson, Miller, Michiels, Wright, commended.

FAIR DIRECTORS MEET

Receive Interim Balance Sheet—Ad. Just Protest Against Judge's Award—Committee Appointed re Financing.

The Fair Directors met on Saturday evening, with President Birkeland, chairman, Vice-President Dr. McEwan, Messrs. Jos. Cole, H. G. Stone, E. S. Hogg, C. C. Gamble, L. E. Ebel, Mrs. Bannerman, Jos. Crutcher, Sheriff McPherson, J. F. Day, H. Wilson, J. J. Richards and F. W. Galbraith present.

Correspondence
A letter was received from Dr. J. A. Harris expressing his appreciation as a Director of an Ontario agricultural society, of the Red Deer Fair, and asking for a copy of the prize list and list of prize-winners.

The Northwest Mill & Feed Co. of Edmonton, wrote saying that they resented the amount of their exhibit this year but hoped to increase it next year.

The Stettin Agricultural Society asked for particulars regarding the Judges books used at the Fair.

Mrs. T. H. Steadman, of Maitland, a fancy work exhibitor, wrote thanking the secretary for the courteous and efficient manner in which her exhibit was looked after at the Red Deer Fair.

The American Trotting Association acknowledged receipt of annual dues.

The Horse Association of America wrote giving a summary of their secretary's trip through Western Canada.

Mr. C. L. Wade wrote, forwarding against the judges of the grains and grasses on the ground that they were not judged by more card and no regulations and that his exhibit of this year's grain in the straw was beaten by an exhibit of last year's grain.

The Directors decided to sustain the Judge's decision, but in view of the fact that some work was not done as provided by Rule 3, they refunded Mr. Wade's money.

The Directors decided to send a letter of appreciation to the Sheesley Shows.

The hay remaining on hand was sold to Alex. McEwan at the prices used at the Fair.

The Secretary and Mrs. H. Wilson were authorized to dispose of the coats, mattresses and pillows.

The Secretary presented an interim balance sheet showing a deficit of \$2,330.66, as follows:

Assets
Cash on hand \$122.86

Those Funny Dyspeptics
After some discussion on different methods of financing, a committee consisting of the President, Secretary, Messrs. Gamble, Welliver, McEwan, Day and Galbraith, were appointed to bring in a report to the Directors on the best methods for financing.

"Dyspeptics are funny people," said Ellery C. Chamberlain, "Chicago dietician."

"Dyspeptics," he went on, "are all alike. I heard a typical dyspeptic giving an order in a Looz restaurant after the opera the other night. The man is a millionaire, and he said: 'Oh, dear, dear, when I was young I could eat anything and pay for nothing. Bring me, waiter, a plate of cherry pie with Roquefort cheese and some plates of human ice cream to top off with.'"

A letter was received from Dr. J. A. Harris expressing his appreciation as a Director of an Ontario agricultural society, of the Red Deer Fair, and asking for a copy of the prize list and list of prize-winners.

The Northwest Mill & Feed Co. of Edmonton, wrote saying that they resented the amount of their exhibit this year but hoped to increase it next year.

The Stettin Agricultural Society asked for particulars regarding the Judges books used at the Fair.

Mrs. T. H. Steadman, of Maitland, a fancy work exhibitor, wrote thanking the secretary for the courteous and efficient manner in which her exhibit was looked after at the Red Deer Fair.

The American Trotting Association acknowledged receipt of annual dues.

ROBB STREET

IMPRISONED IN A REFRIGERATOR

By Joseph Tamm
It was the beginning of the summer
vacation. For the first time Fred
had been away from home for
a week. The help of a neighbor
had got a place for the summer at
Hampstead in the meat department of
the Wholesale Grocery Co.

The wholesale meat business may
seem dull work, but Fred found it most
interesting. In large refrigerators
the Western meats came to the rail-
way siding behind the store. From
the cars an overhead carrying me-
chanism took them into one of the
two great refrigerators, large
enough to hold several car-
loads.

One refrigerator contained the regu-
lar supplies which were drawn from
constantly to meet the needs of the
surrounding country. The other was
known as the reserve refrigerator. It
was never opened except to receive
new supplies or to meet some unusual
demand of the trade.

Fred was interested to find that the
big refrigerators used no ice at all. A
refrigerating machine kept the tem-
perature down to the freezing point.
A powerful pump compressed amon-
ia gas until it became very hot. Then
the hot gas passed through a coil im-
mersed in water, where it was cooled
to the temperature of the air outside.

The gas was then pumped into large
pipes, where as it expanded it ab-
sorbed heat from the pipes and from
the meat in the refrigerator. The
brine was then pumped through the
large coils like enormous radiators
placed along the inside walls of the
refrigerators. The brine was cooled
by the coils were covered with frost.

One Monday afternoon, with his
rascally books in hand, Fred stood un-
der the electric light in the centre of
the reserve refrigerator, checking off
the pieces of meat that were being
brought in and taken out. When the
work was done he handed his note-
book to the chief accountant, who hap-
pened to be passing, and then, remem-
bering that he had left the light burn-
ing in the refrigerator, he opened the
door, walked to the light and snapped
it off.

The door should have been plenty of
light from the open door behind him,
but he found himself in darkness.
"Where some one must have shut the
door," he thought. "I'll turn on the
light again."

Have you ever gone into a dark
room and tried to find an electric
light suspended from the ceiling?
Even though you know within a few
feet where it is, you find it amazingly
elusive. Fred did not know within 10
feet where the light hung, and he
spent five minutes or more in trying to
reach it.

Then he decided that, since the
door was larger than the electric bulb,
he had better turn the door. But
as he quickly realized, he did not know
in which direction to turn the door.

Walking to the nearest wall, he be-
gan to feel his way round the room.
But how should he know the door
when he came to it? Like all refriger-
ator doors, it was thick and set
flush with the wall. The only way
he could be sure to know it when he
reached it was to press steadily
against the wall as he walked along
so that he would push the door open
when he came to it. He walked to the
round the room and pressed the wall
all the time, but no door flew open.
Had whoever shut it also thrown the
bolt?

He shouted and shouted again. Then
he remembered that the walls of the
refrigerator, lined with many
layers of felt, were soundproof. He
grew more and more alarmed, but he
tunefully said about being lost in the
woods popped into his mind. "Do his-
got excited. Don't rush round wildly
and aimlessly. Sit down and think."

Fred sat down on a case of goods
and thought. No one would open the
refrigerator again for several days.
And no one would turn the light on
if I don't appear at the boarding
house to-night," thought Fred. "and
if I don't appear here at the boarding
house to-morrow they will only think I'm
sick or something. I wonder how
long a person can live without eat-
ing. Gee! I'm chilled to the bone al-
ready. Anyway, it would at least
be more comfortable if I could find
that electric light and turn it on.
Trying to find it will keep me warm
for a while."

Jumping from the box, he began run-
ning here and there and waving his
arms over his head, but he did not find
the hanging bulb, nor did he get warm.
He merely grew tired. Finally he set
about the search methodically. He
knew that the future hung in the very
centre of the refrigerator. So he
paced along one side of the room and
found that it was forty steps long. He
paced another side and found that it
was thirty-six steps long. Conse-
quently if he walked back and forth
steps along the side he had paced last
and then twenty steps at right angles
to the wall, he would be in the centre
of the room. He had stumbled over a
small box. Taking it in his hands, he
walked back the eighteen paces along
the wall, then the twenty paces
straight toward the centre of the
room, and stopped. He put his foot
on the floor, stepped on it and felt
about over his head for the bulb. In-
side a minute he had found it.

As he snapped the switch, there
flashed into his mind a possible meth-
od of signalling to the outer world.
But with a pang of regret he realized
it was too late to attract anyone's at-
tention that night.

Then, he knew, had left the place long ago,
and his plan could work only when the
men were working.

He made himself as comfortable as
he could and waited. Every now and
then he got up and walked about and
stamped his chest to drive away the
chill that seemed to penetrate to his
very bones when he did not get warm.
He knew that in that atmosphere he
must not go to sleep. He counted the
rides of meat hung along the walls. He
counted the number of boards in the
opposite wall; he counted the flies
on the ceiling.

It struck him suddenly that the flies
were all on the ceiling. He wondered
why none were on the walls. Why, of
course, warm air rose; it was less
chilly near the ceiling. Setting sever-
al of signalling to the outer world.
But with a pang of regret he realized
it was too late to attract anyone's at-
tention that night.

Then, he knew, had left the place long ago,
and his plan could work only when the
men were working.

He made himself as comfortable as
he could and waited. Every now and
then he got up and walked about and
stamped his chest to drive away the
chill that seemed to penetrate to his
very bones when he did not get warm.
He knew that in that atmosphere he
must not go to sleep. He counted the
rides of meat hung along the walls. He
counted the number of boards in the
opposite wall; he counted the flies
on the ceiling.

It struck him suddenly that the flies
were all on the ceiling. He wondered
why none were on the walls. Why, of
course, warm air rose; it was less
chilly near the ceiling. Setting sever-
al of signalling to the outer world.

on the ceiling.

FREE OF TERRIBLE KIDNEY TROUBLE

After Three Years of Suffering
"FRUIT-A-TIVES" Brought Relief

"For three years, I was ill and
exhausted and I suffered constantly
from Kidney Trouble and Liver Disease.
My health was miserable and
nothing in the way of medicine did
me any good. Then I started to use
"Fruit-a-tives" and the effect was
remarkable."

I began to improve immediately
and this wonderful fruit medicine entirely
restored me to health. All the old pains,
headaches, indigestion and con-
stipation were relieved and once more
I was well."

To all who suffer from Indigestion,
Constipation, Rheumatic Pains or
great Fatigue, I advise the use of
"Fruit-a-tives"

MADAME HORMIDAS FOISY
224 Champlain St., Montreal.

Madame HORMIDAS FOISY.
50c a box, 9 for \$2.50, trial size 50c.
As all dealers or sent postpaid by
Fruit-a-tives Limited, Ottawa, Ont.

retailers called for their morning
supplies.

Getting down from his perch on top
of the packing cases, he went to the
electric light, took out his jackknife
and scraped the insulation from the
two wires that led to it. Then he
carefully held the blade of the knife so
that it connected one bare wire with
the other. There was a flash of fire
and the light went out. Fred knew
that all electrical circuits are guarded
by fuses that melt or burn out when
there is a short circuit or when
for any reason too much current
flows in the wires. He was passing
a burning out a fuse cut off the current
and put out all the lights on the cir-
cuit. The knife blade had short-cir-
cued the current and burned out the
fuse.

All work in the other refrigerator
and in the meat room would have
to stop, for the lights were all on that
circuit and would go out. Then the
men would put in a new fuse and the
lights would burn again. Fred wait-
ed.

In a few minutes, the light in the
refrigerator where Fred was again
burned out. He waited a few minutes
that the men had put in the new fuse.
He waited five minutes and then again
burned out the wires with his knife
blade.

When the lights had gone out for the
fourth time the department manager
became disgusted and sent for an
electrician. He put in a heavy fuse,
he tried to blow out like the others.
Then he began to examine
the wiring. After looking everywhere
he said that the short circuit
must be in the reserve refrigerator.
As they opened the door Fred staggered
out into the warm room. He
thanked his stars that he knew at
least a little about electricity.

BEES BLOCK KENTUCKY ROAD

The road from Concord, Ky., to
Vancouver, has been blocked for sev-
eral days by myriads of honey bees
which for fifty years had used a road-
side tree as an apiary. The tree fell
across the highway before a high
wind, and honey was scattered over a
wide area. The bees refused to relin-
quish position, and all travel was
diverted by a route which causes sev-
eral miles of additional journeying.
Persons who approached the fallen
tree have been routed by fierce on-
slaughts by the bees.

STEAMER AND CARGO COST \$335.

Under the hammer of the auctioneer
on August 8, \$335 bought the steam-
ship Volunda and her cargo, which
two weeks ago had been sold for
hundreds of thousands. The
vessel is lying a wreck in a very pre-
tentious position on New's Harbor, and
exposed to the full sweep of the Atlan-
tic. A storm or even a heavy swell
would cause the whole to disappear,
perhaps in an hour. Harry Elman, of
Sydney, got the ship for \$300 and the
cargo of 2,500 tons of excellent coal
for \$35.

British ex-soldiers who are enlisting
in the Spanish foreign legion recruit-
ing in the British foreign legion re-
cruits who assisted Great Britain in the
war, declared J. Kenworthy, M.P. He
wants to know what the government
is going to do about it.

Ticket Agent.

J. E. PROCTOR,
District Passenger Agent.

BOVINE TUBERCULOSIS A REAL DANGER

Using close co-operation between
the medical profession and the veteri-
nary profession in regard to the
eradication of bovine tuberculosis
was the theme of an address by Dr. F.
T. Torrance, Veterinary Director-General,
before the forty-second annual meet-
ing of the Ontario Veterinary Associ-
ation.

Over four hundred veterinary sur-
geons were in attendance from all
parts of the province. The gathering
was presided over by Dr. J. A. Camp-
bell, of Toronto, who was re-elected
president for another year. Dr. Tor-
rance in part said:

"The attention of the public has not
been sufficiently directed to the
danger of tuberculosis in children.
The tubercular cow is still too
prevalent with its fatal effects."

"Of England's ten thousand
children under the age of five years
who die each year from tuberculosis
34 per cent. are affected with the
bovine type, which can readily be
traced to an infected cow. It would
be reasonable to suppose that the
same percentage of deaths from this
type would apply to the large num-
ber of children under five years who
die annually in Ontario from tuber-
culosis."

Though the problem of
eradication is largely one for veteri-
naries, the question of the disease has
to human life—especially the
lives of milk-drinking children—mer-
ely the support of the medical profes-
sion and the public in the fight.

SWIMB ACROSS ST. LAWRENCE

Miss Frances C. Calvey, swimming
instructor of the Y.Y.C.A. at Quebec,
successfully acquitted the feat of
swimming across the St. Lawrence
River, on August 9, between Levis
and Quebec, before thousands of peo-
ple, who looked on from the cliffs of
Quebec and Levis, as well as from the
river side. The young lady has the
honor of being the first to attempt the
cross-river swim, which was about
one mile, but which had to be fought
all the way, owing to a very powerful
current. The crossing was made in
38½ minutes.

AEROPLANE RIDDLER BOAT

Sweeping down Narragansett Bay
with its machine guns open, and
spraying the water with a rain of
bullets, an unidentified aeroplane
was seen to make a dash for the
launch containing five people, severely
wounding a girl passenger and slight-
ly injuring a young man. The launch
signals from the boat, the plane sped
on its way. With the boat sinking
the girl in the launch was losing
blood, the launch party travelled eight
miles to shore to reach medical aid.

FARMER IS A CONSUMER

(Ottawa Citizen)
The recent tour of the tariff com-
mission in this country brought out
some interesting facts, which, it
seems, are not to be acted on. The
disclosures were in some cases rather
embarrassing to the upholders of the
existing fiscal system, but the giving
of evidence was confined to manufac-
turers and others. The consumer was
not regarded by the commission.
But the farmer is a consumer, also. He
may be able to shed some light on how
he feels to be regarded as the back-
bone of the country and to get little for
it in the way of material advantages
as compared to other factors which are
dependent on the output and product
of his labor.

It may be perhaps imprudent to
suggest that a commission in this
country attempt to ascertain what is
the matter with farming. But we can
look on and may learn something
from the American investigation.

CITIES CONTINUE TO GROW

A preliminary announcement made
by the Dominion Statistician shows
that the population of a large number
of cities marked increase during
the past decade. As a matter of
fact, in a list of sixteen cities tabulat-
ed all but one show an increase over
the returns for 1911, ranging all the
way from 3.6% in case of Woodstock,
to 55.3% in the case of Halifax. The
sole exception in this list of increases
is Brockville, which showed a de-
crease of 3.4%.

Up to date no returns have been re-
ceived in regard to the population of
rural districts.

The fire fund continues to take its
toll. Aymer, Quebec, has been de-
stroyed, with a loss of three-quarters of
a million, while other costly fires in
Quebec and elsewhere follow the
forest fires in Northern Ontario, British
Columbia and the Maritime Provinces.
We burn over two million dollars
a month of crested wealth, besides
amounts untold millions worth of
forests and other natural resources.

Chancellor Wirth of Germany is en-
deavoring to secure the support of all
political factions represented in the
releasing for his plans looking to the
negotiation of a treaty of peace with
the United States.

Fishermen are boarding the wreck
of a Canadian government merchant
marine steamer Canadian Export,
which is stranded off Willapa Harbor,
and are looting her of everything
valuable.

Re T. A. GAETZ

Canadian Credit Men's Trust Assn.

Ald. Best has returned from his vacation at Sylvan Lake.

Don't miss the "Great Air Robbery" at the Rex, Friday and Saturday.

Lieut. Locklear lost his life filming the "Great Air Robbery". Rex, Friday and Saturday.

Geo. Bernard, Vancouver, arrived in the city yesterday, and is visiting his sister, Mrs. (Dr.) H. George for a few days.

L. I. Hamley went to Calgary yesterday to meet Mrs. Hamley and the boys, who are returning from Ontario at the end of this week.

Rev. A. C. Collier, M.A., was able to leave the Memorial Hospital on Sunday. He hopes to be able to take charge of the high school at High River next week. J. Arthur Carswell, B.Sc., takes the position of science master under Mr. Collier, and leaves today for the south.

HOSPITAL DONATIONS

The Matron of the Memorial Hospital wishes to acknowledge receipt of the following donations: Mrs. McCormick, patients' gown; Mrs. J. Goodiey, cauldrons; Mrs. H. Russell, beans; Mrs. A. T. Stephenson, flowers.

CLEARVIEW NEWS

Harvest is well under way. About one half of the wheat is already in stock.

The people in this district seem quite in favor of Municipal Hospitals, the vote being 30 for and 10 against. Miss Edith McKinnon spent last week and with friends in Lethbridge.

Mr. and Mrs. Leslie Hardie, were down from Edmonton for a couple of days.

Mary Comfort and Kenneth Trimble have passed the Grade VIII examination. School re-opens on Monday, August 20th.

Will those schools which are taking part in the Red Deer School Fair for 1921 kindly send in their entrance fee to M.J. Gibson, Sec-Treas., Red Deer.

HILL END NEWS

Everybody is busy cutting grain and berry picking around the Hill.

Mr. and Mrs. Shaw and daughter have been visiting Mr. and Mrs. W. G. Healy.

Miss Winnie Marshall is leaving for Kamloops soon, where she will take up a course in nursing.

Mr. and Mrs. W. G. Healy have returned from a trip to Seattle and report having spent a very pleasant time.

The young people of Hill End do not play ball now on account of the busy season.

School opened August 22. Everyone glad to see Miss Fowler and ready for a term of hard labor.

FOR SALE—A secondhand McCormick Binder in good condition—Apply to E. J. Ramsey. Aug. 22.

LOST—Sable and white. Collie dog, wearing a Red Deer tag, 1919, 1920 and 1921. Last seen on July 31st. Reward will be paid for information leading to his recovery. T. S. Stanway, Red Deer. Aug. 24, 2w.

NOTICE

TAKE NOTICE that certain lands have been sold under the Tax Recovery Act by the Municipal District of Pine Lake, No. 399, on account of non-payment of taxes, and the year allowed for redemption will expire on the 1st day of November, 1921.

A complete list of such lands can be seen in the Alberta Gazette of August 30th, 1921.

If you wish to contest the legality of the sale of such lands you should immediately make application to the Judge of the District Court of the judicial district within which the land is situated, for an order staying the issue of a certificate of title to the purchaser of such lands.

Dated this 16th day of August, 1921, at Red Deer, Alta.

W. E. TRUIMAN, Treasurer.

Aug. 24, 1w.

REX THEATRE FRIDAY & SATURDAY Lieut. O. L. LOCKLEAR The Daredevil of the Skies IN THE GREAT AIR ROBBERY

Zoom!

With Locklear on the Wings of a Plane a Mile Above the Earth.

Loop!

Through the cloud planes on the Trail of the Men who Robbed the U.S. Mail

Spin!

As you Soar with the Camera Man above the Jaws of Death, "Shooting" for your Life.

Jump!

From your seat as Locklear jumps from Plane to Plane, to foil a Bandit of the Skies.

The most astounding drama since the discovery of motion pictures. There's only one thrill—that lasts from start to finish.

The Rex Concert Orchestra, Mr. H. Bone conducting

CARD OF THANKS

We would like, through The News to thank all the people for their kindness and sympathy in the sad loss of our boy, and for the help given us in the loss of our home. We feel most grateful to one and all for help and sympathy in our bereavement.

MR. AND MRS. E. W. LEWIS.
Blackfalds.
